TREND

The **TREND** collection of chest of drawers for living room is a combination of ten independent solids in five color versions. Among them, you will find elements such as: chests of drawers, display cabinets, bedside tables and coffee tables. Each of them looks great exposed alone as a distinctive element in the interior. Sand beige, gray, white, black or artisan oak – decide for yourself which color will blend better with your arrangement.

3 types of corrugation

Interiors are different, and every detail, even the smallest, affects their final character. Depending on the color scheme of the furniture, we used different corrugation. Fronts of furniture pieces in artisan oak and black are decorated with a straight milling, white and gray with a semicircle, and furniture in sand beige with a milling in the form of a half-shaft.
